

CONTENTS OF VOLUME 24

Number 1

- | | |
|--|---|
| <i>E. A. Marshall and W. M. Pickering</i> | 1 The computational restoration of autoradiographic images |
| <i>B. P. Bergeron, L. Sato and R. L. Rouse</i> | 11 Morphing as a means of generating variation in visual medical teaching materials |
| <i>E. J. Ciaccio, S. Weiner, S. S. Reisman, S. M. Dunn and M. Akay</i> | 19 Pattern recognition and interpretation of electro-myogram data from cat jaw muscle |
| <i>Tze-Wen Chung and E. A. O'Rear</i> | 31 A model for analyzing the formation of thrombin in vessels |
| <i>A. van Rotterdam, F. W. Schultz, W. A. Hummel, J. Zoetelief, J. J. Broerse and C. Nyqvist</i> | 43 PCDOSE: an interactive software system to calculate internal radiation dose on a personal computer |
| <i>A. V. Parisi and G. D. Allen</i> | 61 A computerized acquisition technique for the Wingate anaerobic test |
| <i>B. Sankur, Y. P. Kahya, E. C. Güler and T. Engin</i> | 67 Comparison of AR-based algorithms for respiratory sounds classification |
| Software Survey Section | I |

Number 2

- | | |
|---|--|
| <i>T. D. Lagerlund and P. A. Low</i> | 77 Mathematical modeling of hydrogen clearance blood flow measurements in peripheral nerve |
| <i>P. Lánský and V. Lánská</i> | 91 First-passage-time problem for simulated stochastic diffusion processes |
| <i>M. A. Helal</i> | 103 Derivation of closed-form expression for the cerebral circulation models |
| <i>E. D. Schneiderman, C. J. Kowalski, S. M. Willis and I. Y. Guo</i> | 119 A PC program for computing confidence bands for average and individual growth curves |
| <i>J. M. Ribeiro, R. Fontes and A. Sillero</i> | 129 Enzyme inhibition as visualized with the reservoir model: relationships between I_{50} and inhibition constant(s) of an enzyme inhibitor |
| <i>Jing Bai, Dongsheng Wu and Jupeng Zhang</i> | 145 A simulation study of external counterpulsation |

*B. P. Bergeron, R. S. Shiffman
and R. L. Rouse*

157 Data qualification: logic analysis applied toward
neural network training

Announcement

165

Software Survey Section

I

Number 3

G. Görög

167 An Excel program for calculating and plotting
receiver-operator characteristic (ROC) curves, histo-
grams and descriptive statistics

*K. Shimomura, H. Shono, M. Kohara,
A. Uchiyama, Y. Ito and H. Sugimori*

171 Neonatal assessment using the Apgar fuzzy expert
system

A. Gavaille, B. Bardy and A. Andremont

179 Measurement of inhibition zone diameter in disk
susceptibility tests by computerized image analysis

*A.-N. B. Kuhn de Chizelle
and J. J. DiStefano III*

189 MAMCAT: an expert system for distinguishing
between mammillary and catenary compartmental
models

J. C. Calvo

205 Dataload: a user-friendly program to prepare binding
data for the "LIGAND" software

J. Lee

211 Comparing several proportions when the exposure
variable is either ordinal or ratio which has been
grouped into discrete classes

N. Fujishiro, J. Hatae and H. Kawata

221 A program for calculation of the proton activity
coefficient

E. Q. Chen and C. F. Lam

229 Predictor-corrector with cubic spline method for
spectrum estimation in Compton scatter correction of
SPECT

Software Survey Section

I

Number 4

F. Pinciroli, C. Combi and G. Pozzi

243 A database schema for public-domain medical
software

*O. Barnea, D. Jaron
and W. P. Santamore*

255 Autoregulation in the stenosed coronary circulation

R. Ball and S. L. Schwartz

269 CMATRIX: software for physiologically based
pharmacokinetic modeling using a symbolic matrix
representation system

IV

| | | |
|--|-----|--|
| <i>H. Kessels, G. Willems and H. C. Hemker</i> | 277 | Analysis of thrombin generation in plasma |
| <i>M. A. Grasso and C. T. Grasso</i> | 289 | Feasibility study of voice-driven data collection in animal drug toxicology studies |
| <i>W. Kwok, L. Wiegand, D. S. Channin and D. A. Wiegand</i> | 295 | Development of the bi-directional ultrasound system for base of tongue imaging |
| <i>M. D. Orosz, N. S. Bradley and S. H. Chambers</i> | 305 | Correcting two-dimensional kinematic errors for chick embryonic movements <i>in ovo</i> |
| <i>P. L. Chang, Y. C. Li, C. J. Wu, M. H. Huang and P. J. Haug</i> | 315 | Clinical evaluation of a renal mass diagnostic expert system |
| <i>E. D. Schneiderman, S. M. Willis and C. J. Kowalski</i> | 323 | A PC program for classification into one of several groups on the basis of longitudinal data |
| Software Survey Section | I | |

Number 5

SPECIAL ISSUE: THE ARDEN SYNTAX

| | | |
|---|-----|---|
| <i>G. Hripcsak</i> | 329 | The Arden Syntax for medical logic modules: introduction |
| <i>G. Hripcsak</i> | 331 | Writing Arden Syntax medical logic modules |
| <i>R. A. Kuhn and R. S. Reider</i> | 365 | A C++ framework for developing medical logic modules and an Arden Syntax compiler |
| <i>R. P. Spates and K. C. Aller</i> | 371 | One vendor's experience: preliminary development of a reminder system based on the Arden Syntax |
| <i>P. Ludemann</i> | 377 | Mid-term report on the Arden Syntax in a clinical event monitor |
| <i>R. A. Jenders, M. Morgan and G. O. Barnett</i> | 385 | Use of open standards to implement health maintenance guidelines in a clinical workstation |
| <i>T. A. Pryor</i> | 391 | The use of medical logic modules at LDS Hospital |
| <i>H. Åhlfeldt, B. Johansson, R. Linnarsson and O. Wigertz</i> | 397 | Experiences from the use of data-driven decision support in different environments |
| <i>F. M. H. M. Dupuits</i> | 405 | The use of the Arden Syntax for MLMs in HIOS+, a decision support system for general practitioners in The Netherlands |
| <i>J. B. Starren, G. Hripcsak, D. Jordan, B. Allen, C. Weissman and P. D. Clayton</i> | 411 | Encoding a post-operative coronary artery bypass surgery care plan in the Arden Syntax |
| Software Survey Section | I | |

Number 6

- | | | |
|--|-----|--|
| <i>M.-C. Su</i> | 419 | Use of neural networks as medical diagnosis expert systems |
| <i>S. K. Chittajallu and D. Wong</i> | 431 | Connectionist networks in auditory system modeling |
| <i>P. K. Sadasivan and D. Narayana Dutt</i> | 441 | Minimization of EOG artefacts from corrupted EEG signals using a neural network approach |
| <i>N. Budin and S. Abboud</i> | 451 | Real-time multichannel abdominal fetal ECG monitor using digital signal coprocessor |
| <i>T. B. Givens, T. J. Fischer and J. B. Callahan</i> | 463 | Improvements in accuracy and reproducibility of quantitative clotting factor assays by use of a novel approach for modeling reference curves |
| <i>M. Ikeda, E. Hayashi and K. Yamauchi</i> | 473 | Model analysis of time duration in a medication order entry system with attention to do-medication orders |
| <i>C. J. Kowalski, E. D. Schneiderman and S. M. Willis</i> | 485 | PC program for assessing the relationship between rate of change and initial value |
| <i>O. Sveen, K. Borthne and A. O. Aasen</i> | 493 | Computer acquisition, analysis and presentation of results from a Cobas TM Bio analyser |
